AUSTRALIA	95,576,188	119,222,062	80.2%

Notes:

- Bulk billing figures for non-referred GP attendances do not include Practice Nurse items.
- Data is based on the date the claim was processed by Medicare Australia.
- Only health services receiving a Medicare benefit rebate appear in Medicare data sets.
- Data has been allocated to electorate using the patient's enrollment postcode.
- Where a postcode boundary overlaps different electorate boundaries, the postcode data is allocated to the respective electorates using a postcode-to-electorate concordance file, built by the Department of Health and Ageing, using Australian Bureau of Statistics (ABS) population data. This assumes that Medicare postcode data is geographically distributed in the same proportions as the population was distributed for these split postcodes. This may result in some postcode based service and funding data being allocated to an electorate different to that of the address of the service provider or user.
- Where possible, PO Box postcodes have been allocated to an electorate using geospatial programs and a PO Box/delivery area postcode file from Australian Post.
- Electorate data should not be aggregated to produce state totals as some postcode data cannot be allocated to electorate but it can be allocated to a State. See State/Territory table included in the attached PDF and RTF files.
- It is important to note that some people would receive assistance from services outside this electorate, and similarly services located in this electorate may provide assistance to people living in other electorates.
- In compiling statistics by state/territory, the patient's postcode has been allocated to only one state. In contrast, the electorate concordance file, allocates fractions of particular postcodes across states. Some postcodes are not represented on the concordance file. As a consequence, state/territory totals derived from aggregations of electorate data, differ slightly from state/territory data in this report, or elsewhere.
